# Vibrators, Link Lock® Rotary Action Latch

## Air-Powered Impact Vibrators

For Foundry Applications on Matchplates and Shell Core Machines

Vibrator bodies are made of rugged steel with hardened end heads. Pistons are heat treated, precision ground, and chrome plated. Full porting ensures quick starting, full power, and smooth operation.

Air-Powered Impact Vibrators are designed for foundry applications on matchplates and shell core machines. They maintain high production by keeping maintenance and wasted man hours to a minimum. The vibrators are easily mounted for continuous duty and are protected against dirt intake.

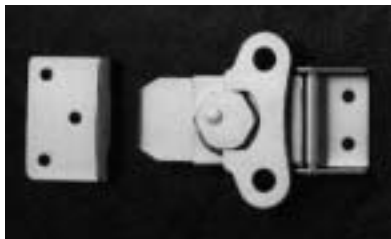

Mfr's. Code	Piston Diameter (Inches)	Hole Diameter (Inches)	Overall		Catalog Number
			Length (Inches)	Width (Inches)	
SA-EP	1/2	5/16	5-3/16	1-13/32	829-SAEP08
	5/8	3/8	5-3/8	1-17/32	829-SAEP10
	3/4	3/8	5-3/8	1-23/32	829-SAEP12
	1	1/2	5-15/16	2-1/32	829-SAEP16
	1-1/4	1/2	7-5/8	2-3/4	829-SAEP20

Other Air Powered Impact Vibrators are available on request.

To order specify catalog number and quantity desired.

### Link Lock Latches

These heavy duty cam-action latches assure positive locking. Their compact, low profile design makes them ideal for core boxes and prototype or short run molds. Available in two sizes, both are zinc plated carbon steel.

#### Riveted Hex Cam Style

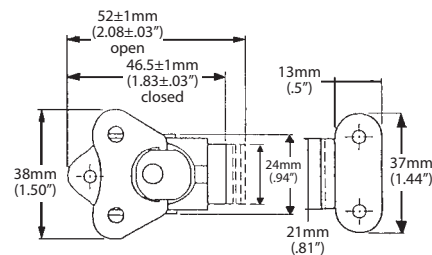

900 lbs. load carrying capacity

Latch Type	Catalog Number
