

# Quik-Change Rubber Letters, Figures & Holders

## The Fast Way to Change Characters

Each holder is approximately 12" long and can be cut easily to any desired length. Holders can be put into or over contours, and can be glued, nailed or screwed into place. Letters are flexible and are easy to change, and snap in or out of the holder. Economical in cost, they can be used wherever temperatures do not exceed 200° F.

Letter, Figure, Holder Height (Inches)	Catalog Number	
	Letter/Figure	*Holder
1/4	335-L04	335-H04
3/8	335-L06	335-H06
1/2	335-L08	335-H08
3/4	335-L12	335-H12

\*Approximate 12" lengths

## Date Tags

### For Designating Date of Manufacture

Date Tags are aluminum, brass, or white metal markers, numbered 1 through 366, and are used to indicate the day on which a casting is manufactured. Standard tags are 1-1/8" long x 5/16" wide with a 5/32" radius on each end. Letters are 3/16" high heavy hairline. Two holes are cast into the date tag so that it may be readily screwed onto the pattern.

Date Tags other than standard can be made to customer's specifications.

To Order Date Tags Specify:  
(1) Date Required  
(2) Metal  
(3) Quantity Required

*For other methods of marking patterns, see Tape-writers and Tapes.*

Letters are flexible and can be "Snapped" in and out easily.

## Master™ Universal Adhesive and Solvent

### For Attaching Pattern Letters

MASTER Universal Adhesive fastens pattern letters and/or figures in place. When properly applied, it eliminates the possibility of a loose or missing character to spoil a mold or casting. It works equally well on wood, aluminum, white metal or brass.

This adhesive is easy to use, sets quickly, and is waterproof. It is not affected by core oils, washes, and other chemicals commonly used in foundries.

MASTER Universal Adhesive Solvent is used as a thinner, for cleaning brushes and for wiping up any surplus MASTER Universal Adhesive.

Size	Description	Catalog Number
1 quart	Universal Adhesive	920-UA1Q
