

Celastic Lagging and Solvent, Flex-Gate and Layout Sheets

Celastic Lagging Material and Solvent (while supplies last)

Easy Way to Build Up Patterns

This felt-like, colloid-treated fabric simplifies the process of building up wood and metal patterns. It shapes to any contour and bonds permanently to wood or metal. Made in three thicknesses (shrinks slightly after application), it hardens and works like wood.

Celastic is extremely easy to use. It can be cut to size and stands up well under the abrasive action of sand. After the material has been applied and completely sets, it can be worked, if necessary. Softens when dipped momentarily in Celastic Solvent.

Celastic Lagging Material

(available by the yard)

Approx. Thickness (Decimal)	Size	Catalog Number
.031	30" x 40"	991-01

To Order Specify: (1) Number of Yards
(2) Catalog Number

Celastic Solvent

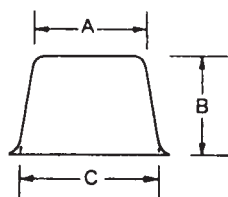

Size	Catalog Number
1 gallon	921-CS1G

To Order Specify: (1) Number of Gallons
(2) Catalog Number

Flex-Gate Plastic for Gates

Replace Wood Gates on Patterns

Flex-Gate is a strong, resilient, flexible plastic for use instead of wood gates on patterns. It can be sawed or cut with a knife and then fastened to the pattern by any standard method (nails, screws, glue).

Its concave base holds it securely on the pattern. Since it does not break or tear, it can be removed and reused.

To Order Specify: (1) Number of Yards
(2) Catalog Number

Flex-Gate

(available in three-foot lengths)

Dimensions	Sizes (Inches)		
	Catalog Number		
	990-F0208 No. 8	990-F0216 No. 16	990-F0220 No. 20
A	1/2	5/8	1
B	1/2	3/4	3/4
C	5/8	1	1-1/4

Template and Layout Sheets

Easily Cut and Scribed

These .030" x 21" x 50" clear plastic transparent sheets are ideal for template and layout work. They are easy to mark with a scribe, take a fine line, and can be easily cut.

To Order Specify: (1) Number of Sheets
(2) Catalog Number

Description	Catalog Number
Template and Layout Sheets	990-S0101
